

## CMM Provides Custom Coating And Laminating Company With Rewarranted Catalytic Oxidizer

When a manufacturer of custom coated and laminated films and metalized films needed to replace an old catalytic oxidizer, they selected The CMM Group to provide them with a rewarranted 19,000 scfm catalytic oxidizer.

After the original unit was picked up, inspected and equipped with any required replacement parts, CMM delivered and set-up the unit at the customer site. Equipped with a precious metal bead type catalyst, the unit was guaranteed to provide a 98% VOC destruction efficiency and includes an insulated hot-side by-pass duct with an automated damper, 70% efficient plate type heat exchanger with heavy duty expansion joints and a modem for remote access.
